	5°	After the disturbances, 212 workers of the Bauunion Brandenburg disappear at their places of work on 19 June. Therefore, these workers dismissed by the construction staff at the airfield. The Thueringiad Baugenossenschaft, which employed about 200 workers at the field for unloading construction material and maintenance work on the tracks. canceled its work contract in June. As replacements, about 500 constricts workers of the Bauunion Nordost were tobe hired. A total of 1.83 construction workers were employed at the field in late June.	ere :e :e
J	. 6,	of the field in June, It was half completed by 26 June. Work was com	leted
		on the water conduit from Beber Lake to this installation. Strips 1 on the runway were entirely concreted. Strip 5 was concreted to a le	egth
		of about 2,800 meters and strip 2 to about 2,000 meters by 26 June. concreting work was delayed and leveling had to be resumed on the extension of the strip and the strip are strip as the strip and the strip are strip as the strip as	
		ed area because of heavy rainfall during the second half of June. Fe	ween
		13 April and 20 June, a runway area of \$7,384.82 square meters had beconcreted. Excavation work on the new taxiways was done by scrapers.	en bich

i.	8.,	An area, 800 meters square, located approximately in the middle of the field and 150 meters north of the northern edge of the runway, was cleared of woods for an undetermined purpose.	• •
	9,	Construction superintendent Koetz (fmu) stated that, upon completic the construction, in forest sections Nos 124,125 and 126, which at pure 95 percent completed, the construction workers were to be emuliar the construction of an underground fuel dump.	esent
	lo.	The following construction materials arrived at the field between 8 February and 20 June:	
		14,923 tons of Portland cement; 18,568.58 tons of 7/15-type chippings; 25,602.04 tons of 15/30-type chippings; 62,439.44 tons of gravel; 517.2 tons of coal.	
,		Natural consumed between 13 April and 20 June included:	
		10,346.43 tons of 7/15-type chippings; 13,963.23 tons of 15/30-type chippings; 44,336.47 tons of gravel.	
	11	The previous ratio of mixture was changed as follows because of the quality of the gravel received: 300 kg of Portland cement, 296 kg of 7/15-type chippings, 391 kg of 15/30-type chippings, 1,310 kg of gravated 103 kg of water.	
	12.	By an order issued during the second half of June, after work hours all construction plans had to be handed over to Schiele (fmu), surveyed registrar, who kept the documents in a safe. The construction at the field hired construction workers and construction machines from Beaumion Nordost.	⊬or ⊍ ff
